

This will only work on a PC. Please contact us if you are using a Mac.

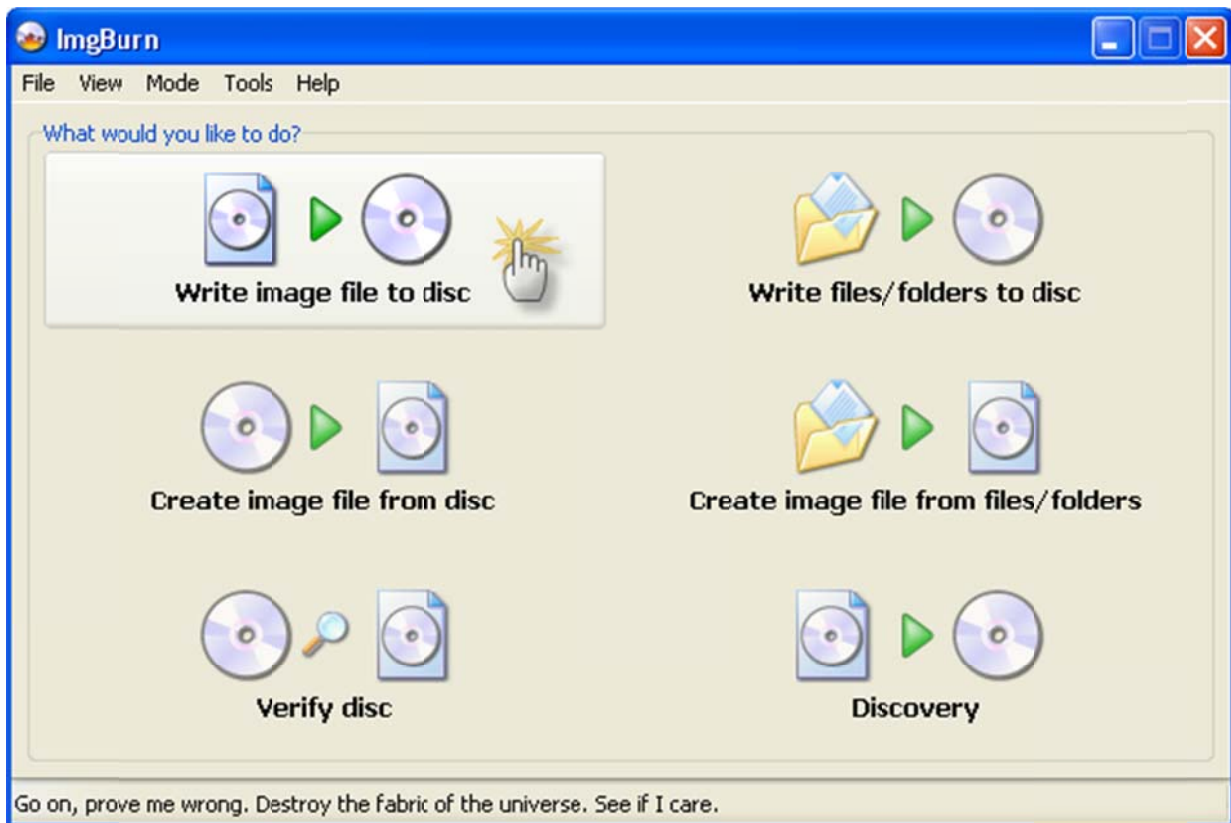

ImgBurn is a free burning software for PC. You can download the installation file here.
<http://imgburn.com/index.php?act=download>

1. Load ImgBurn

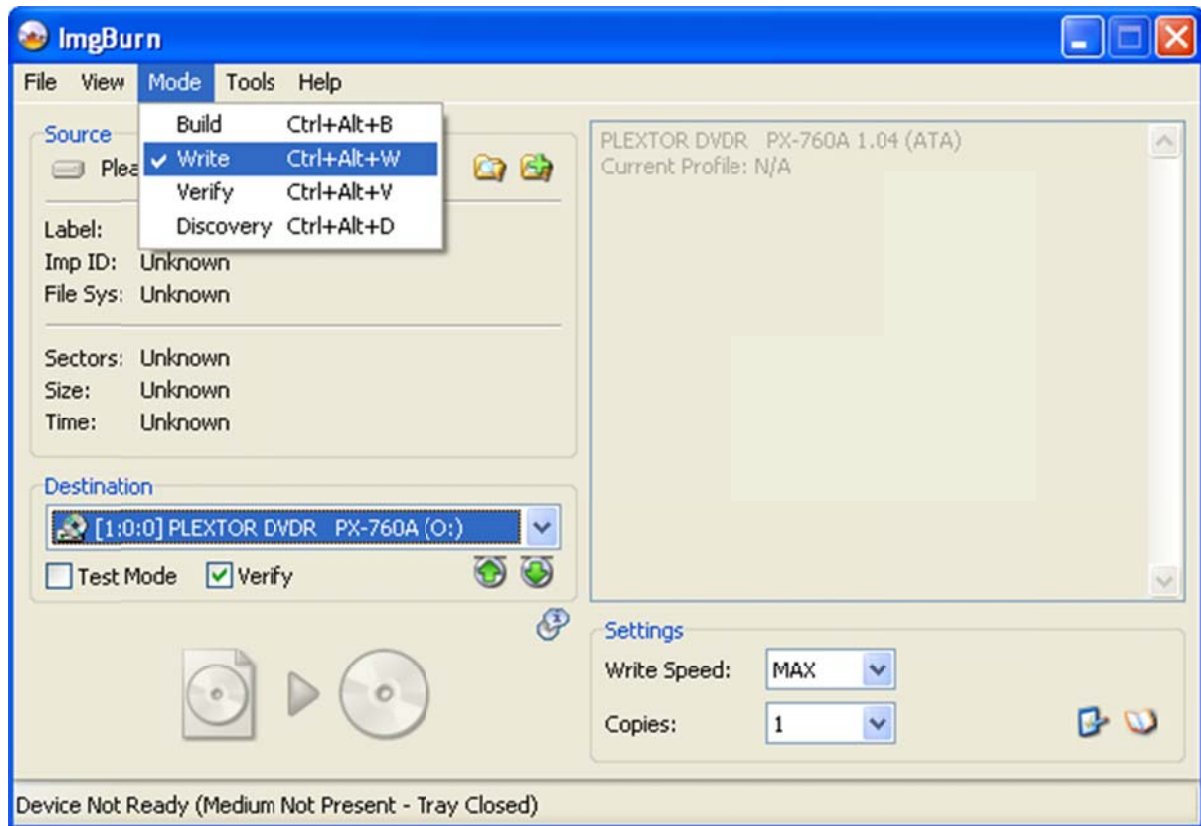

2. Switch to 'Write' mode.

2a. You can do that via the 'Write image file to disc' button on the 'Ez-Mode Picker' screen.

or

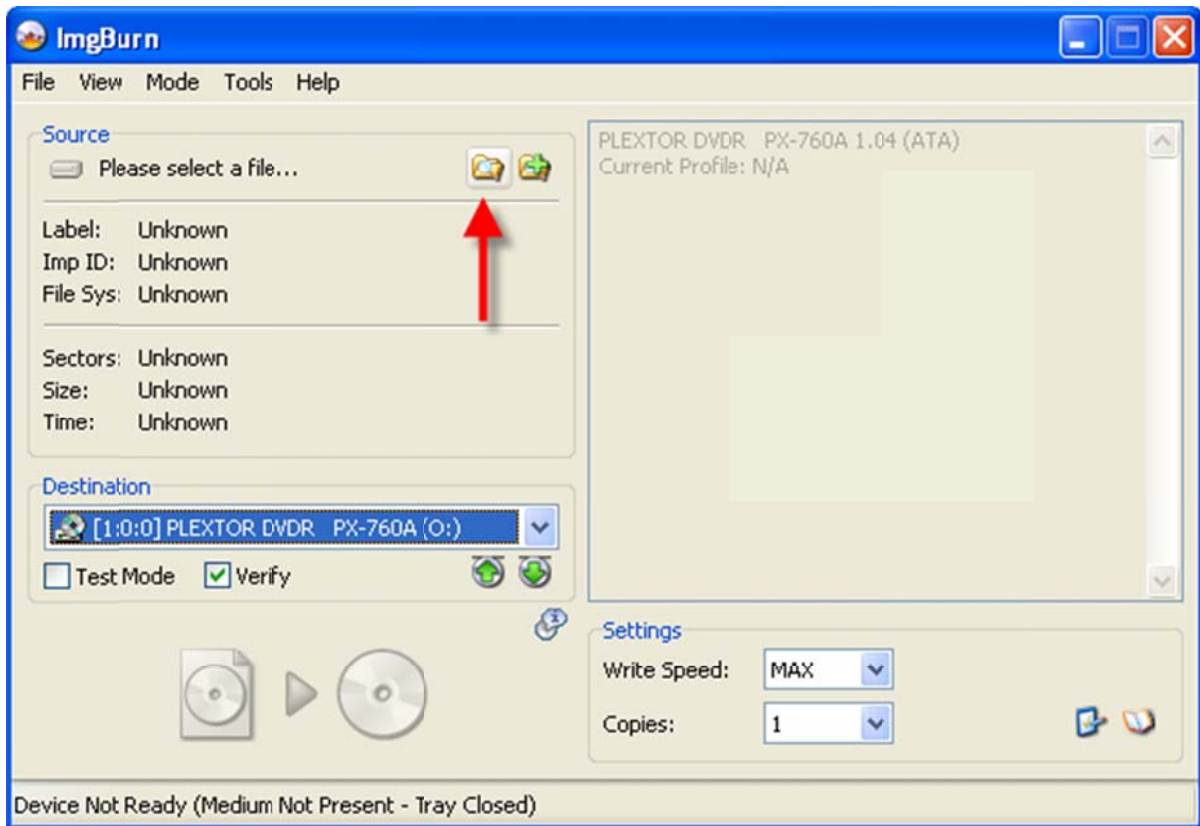

2b. Click the 'Mode' menu at the top and then the 'Write' option.

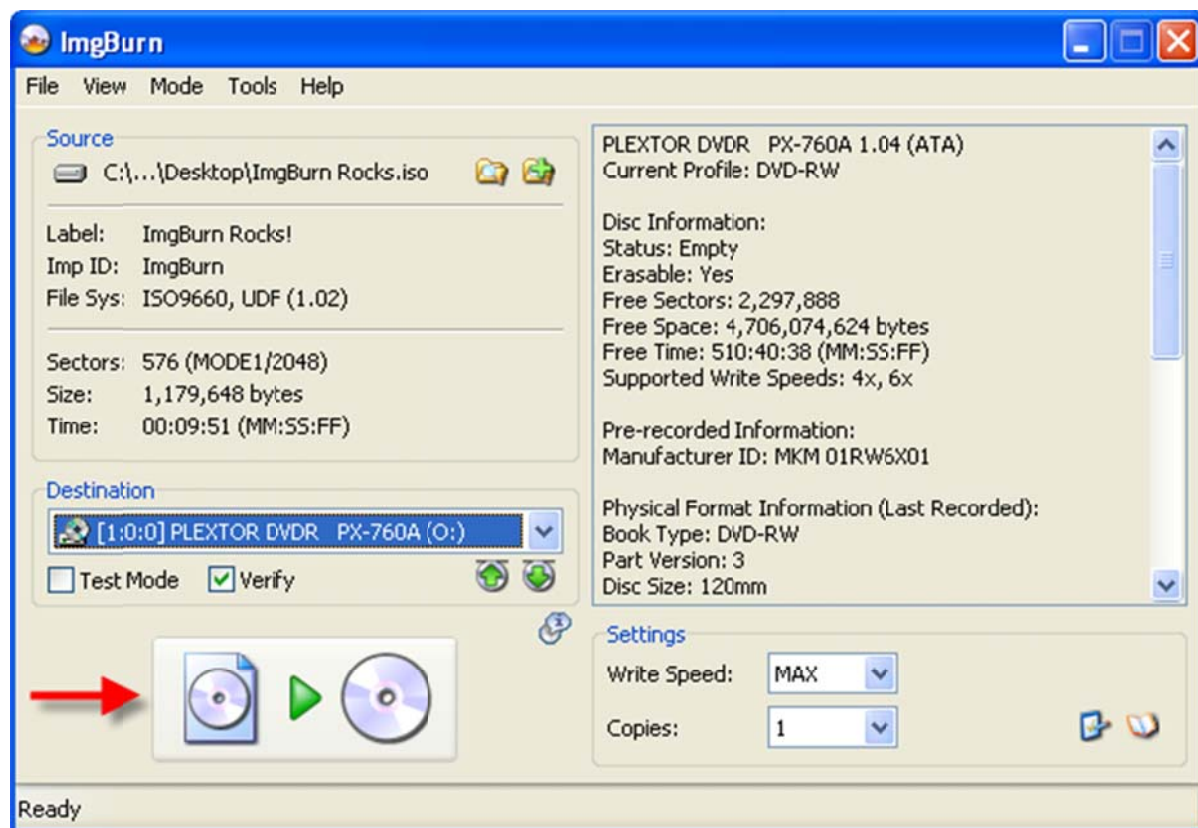

3. Insert blank CD/DVD/BD (depending on image size!)

4. Select a file to write by clicking on the 'Browse for file' button.

If you created the image with ImgBurn, you should be looking for a *.CUE / *.MDS file initially. If you can't locate one of those with the name you're expecting, go for whatever is left! (probably a *.ISO file)

5. Click the big 'Write' button.

6. Wait for your disc to burn.....

Finished!
